ARE GIOVANNI BATTISTA AND AGOSTINO SIBLIINGS TO EACH OTHER?

Conclusion: No they are not. While they each have a father named Michele Angelo, the records of births of the children born to Agostino and Lucia between 1708 and 1726 uniformly refer to the paternal grandfather, Michele Angelo, as deceased, whereas the records of birth of the children born later in time to Giovanni Battista and Pasqualina between 1762 and 1774 uniformly refer to the paternal grandfather, Michele and Michele Angelo, as still living

MICHELE ANGELO LAGOMARSINO (RIN 6774), AGOSTINO (RIN 3806), GIOVANNI BATTISTA (RIN 6772) have appeared in the database up until today (Sunday, January 29, 2023) as members of one purported nuclear family as follows:

Agostino (RIN 3806) is the direct-line ancestor (sixth great-grandfather); Giovanni Battista (RIN 6772) is not a direct-line ancestor.

I have today removed Giovanni Battista Lagomarsino (RIN 6772) from the purported nuclear family and adjusted the dates for Michele Angelo Lagomarsino (RIN 6774) as follows:

Because Agostino (RIN 3806) was likely born between 1676 and 1688 (those dates having been obtained by having calculated back 20 years from the 1708 birth of the first child and 50 years back from the 1726 birth of the last child born to Agostino and Lucia, it can be estimated that Michele Angelo (RIN 6774) may have been born sometime between 1626 and 1668.
